GREENFORGE ENERGY CORP. - ITEM 1A RISK FACTORS (SYNTHETIC TEST PDF)
Ticker: GFEN | Fiscal year ended September 30, 2024

COMMODITY PRICE VOLATILITY
Fiscal 2024 revenue was $1.156 billion; about 71% came from wholesale electricity sales.
A sustained 15% decline in average realized power prices could reduce annual EBITDA by $95 million to $120 million.

PROJECT CONCENTRATION
Cedar Ridge Wind (420 MW), Solstice Solar Park (310 MW DC), and Harbor Battery Storage (150 MW / 600 MWh) generated 58% of FY2024 operating cash flow.
An unplanned outage at Cedar Ridge lasting more than 90 days could reduce annual free cash flow by about $41 million.

REGULATORY AND PERMITTING
Falcon Prairie wind project target COD Q3 2026; expected capex $780 million.
If COD slips beyond December 31, 2026, approximately $22 million of PTC bridge benefits may be forfeited.

COUNTERPARTY AND LEVERAGE
Investment-grade offtake covered 64% of expected 2025 generation.
Prairie Cooperative Utility is 11% of contracted MWh; default would leave about 1.4 TWh on spot markets.
Total debt: $2.04 billion. Revolving credit drawn: $650 million at 6.85%.
Net debt / EBITDA covenant max 4.75x; actual ratio at year-end: 3.9x.
Board dividend target: $0.48 per share annually.

PHYSICAL AND CYBER RISK
April 2024 ice storm damaged 47 turbines at Cedar Ridge; restoration $31M net of $18M insurance.
February 2024 ransomware disrupted Solstice SCADA for 36 hours. FY2025 cyber budget: $14.5 million.
